Flow-Forming

SCO's flow-forming technology empowers us to manufacture wheels that are lighter, stronger, and deliver exceptional performance – without breaking the bank. Here's why SCO's flow-formed alloy wheels are the best for you:

- ✔ **Intricate Design Freedom:**
We can handle even the most complex designs for passenger cars, SUVs, and performance vehicles with wheel sizes ranging from 17x7.5" to 26x12".
- ✔ **Unmatched Performance:**
Our advanced process creates wheels that are up to 15% lighter than traditional casting, enhancing fuel efficiency and handling.
- ✔ **Strength & Durability:**
Flow-forming boosts stiffness, impact resistance, and overall strength, ensuring your wheels conquer any terrain.
- ✔ **Cost-Effective Powerhouse:**
Compared to forged wheels, flow-forming delivers superior performance at a fraction of the price, making it an attractive upgrade for your customers.
- ✔ **High-Quality Finishes:**
Choose from a variety of stunning options, including dual-coat, diamond-cut, inserts, and milled-edge finishes, to perfectly complement your brand identity.
